// VIBE CODER · WEB DEVELOPER

I build websites that *refuse* to be *ordinary.*

I build by **vibe coding**: I describe the vision, AI writes the code, and I direct, review and polish every detail until your website is fast, animated, responsive and live.

FOCUS

Websites, landing pages, online stores

STACK

HTML · CSS · JavaScript · React · GSAP

WORKFLOW

Prompt → Build → Test → Ship

AVAILABLE

For freelance projects · Pakistan

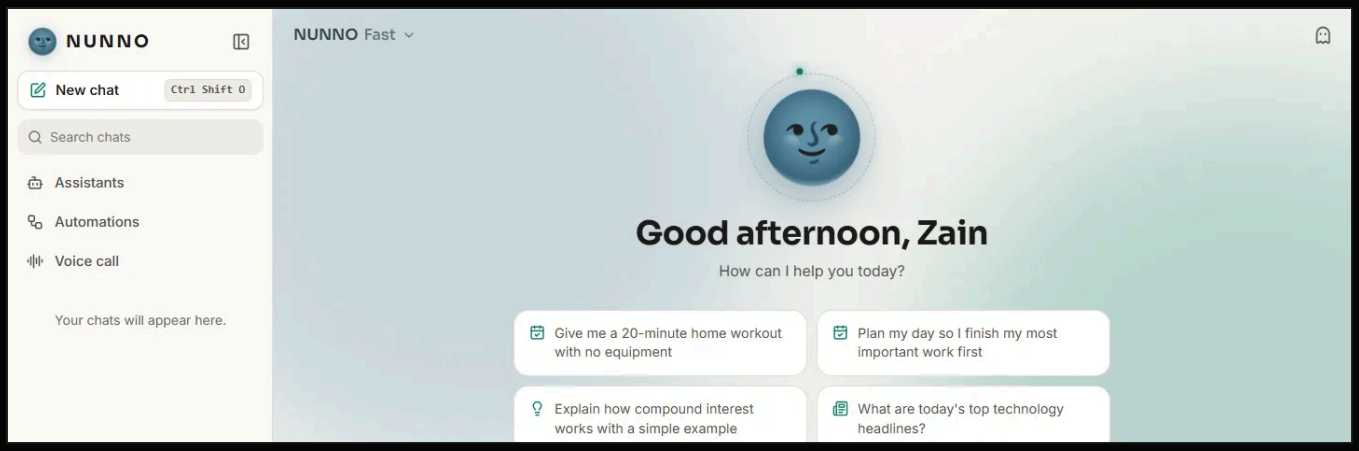
Selected *work.*



01 OWN LIVE PRODUCT

NUNNO My own AI assistant app

A live AI assistant I designed, built and launched: chat with three Claude modes, live web search with sources, voice calls, scheduled automations, custom assistants, memory and a goal planner that checks your work through proof links or Claude Code. It installs on phones as an app, with Pro plans and an owner dashboard.

React | TypeScript | Claude API | Node.js | PWA

Open live: nunno-production.up.railway.app →

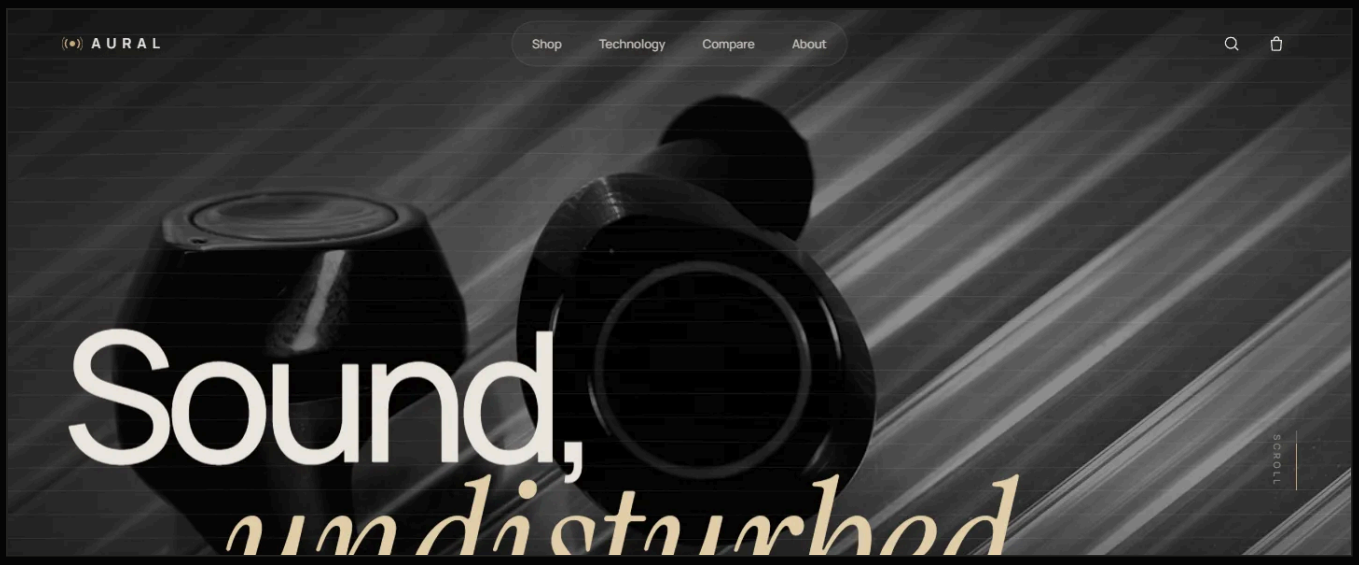
02 CONCEPT PROJECT

Tidewise Personal finance app

A fast, private money app: an animated net worth chart, cash flow and category breakdowns, budgets that forecast where the month will land, savings goals with arrival dates and automatic bill and subscription detection. Command menu, CSV import, themes and offline install.

React | TypeScript | Zustand | SVG charts | PWA

Open live: tidewise-finance.vercel.app →



03 CONCEPT PROJECT

AURAL Premium audio store

A dark, cinematic store for a fictional headphone brand: an original 3D earbuds film rendered from its own model, scroll-scrubbed product films, a custom cursor, a pointer-reactive sound field, full shop, bag and demo checkout.

React | GSAP | three.js | Canvas

Open live: aural-store.vercel.app →

04 CONCEPT PROJECT

Onyx & Fog Fine-dining restaurant

A concept site for a fourteen-seat tasting counter in San Francisco: a cinematic intro, a pinned sideways gallery of seven photographed courses with a pairing toggle, and a reservation flow with live availability, pricing, a confirmation code and a calendar file.

GSAP | ScrollTrigger | Lenis | JavaScript

Open live: onyx-and-fog.vercel.app →

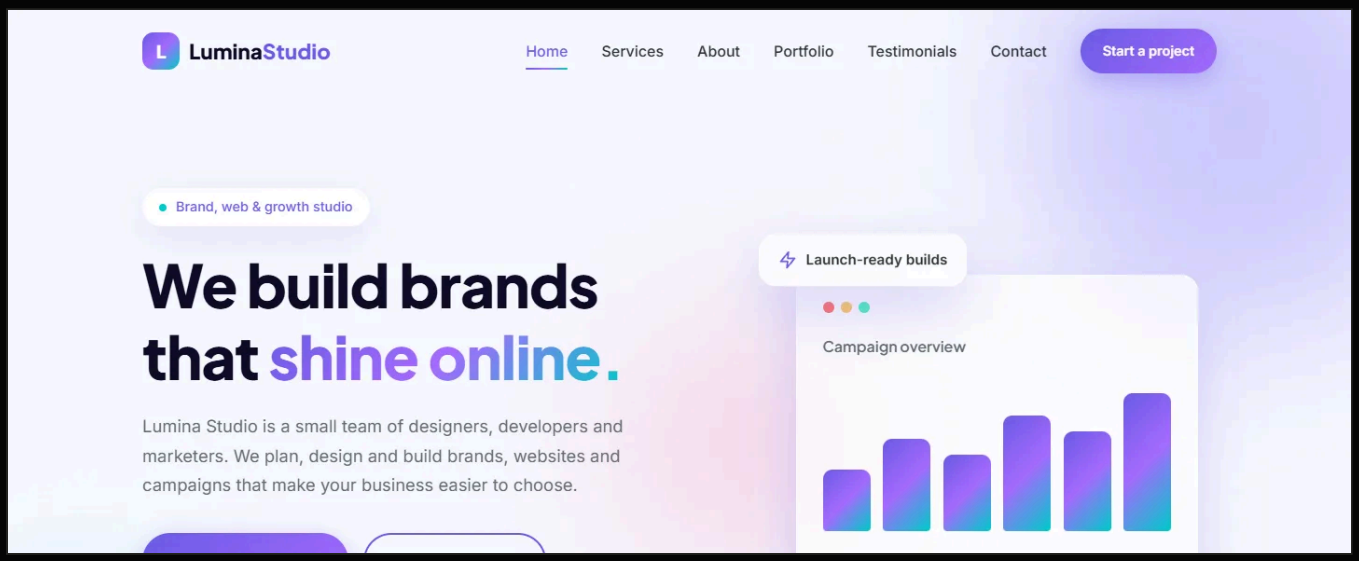
05 CONCEPT PROJECT

ELYRÉ Luxury fashion house

A concept for a luxury house in black, ivory and gold: men's and women's collections, editorial photography, three.js depth and a complete store with an admin dashboard.

React | three.js | Supabase | Netlify

Open live: elyre.vercel.app →



06 CONCEPT PROJECT

Lumina Studio Agency website

A bright, accessible website for a fictional digital agency, hand-built in plain HTML, CSS and JavaScript: portfolio filters, project pop-ups, a testimonial slider and validated forms.

HTML | CSS | JavaScript | WCAG AA

Open live: lumina-studio-agency.vercel.app →

What I build, and *how.*

WHAT I CAN BUILD

- Landing pages
- Portfolio websites
- Online stores
- Shopify themes
- Web apps
- Admin dashboards
- Booking and order forms
- Browser games
- 3D and WebGL scenes
- Scroll-driven stories
- AI assistants and chatbots
- AI-powered features
- Redesigns and speed fixes
- Deployment and domains

FROM BRIEF TO LAUNCH

01 **Brief**
We agree on the goal, the audience, the pages and the must-haves.

02 **Direction**
Colours, type, references and motion, approved before I build.

03 **Build**
I prompt the AI in small, clear steps and review every change.

04 **Test**
Real phones, tablets and desktops, plus keyboard, contrast and reduced motion.

05 **Ship**
Fast hosting, your domain connected, and the code handed over.

06 **Improve**
Feedback turns into updates in hours, not weeks.

AI	Claude and Claude Code
FRONT END	HTML, CSS, JavaScript, React, Vite, GSAP, three.js, WebGL
BACK END	Node.js, Express, TypeScript, Supabase
HOSTING	Vercel, Netlify, Railway, GitHub, custom domains

Have a project *in mind?*

Send a short brief through the form on my site and I will reply with a plan, a timeline and a price.
